Prescription Lift by Target_Segment

Key Performance Metrics: Reached **361 target HCPs** with a **$33.72K spend**, generating **1,000 incremental NRx** at an efficient **$26 per incremental script**.

High-Value Segment Impact: **Tier 1 HCPs drive the vast majority of performance**, contributing **61% (774 NRx)** of total prescription lift compared to Tiers 2 & 3.

Engagement Rate % by Channel

Total Spend, Prescription Lift and Total Engagements by Campaign_Name

Dominant Channel Efficiency: **Rep visits achieved 100% engagement efficiency**, outperforming digital channels (Website 9%, Email 4%, Search 4%) as the primary driver of HCP action.

Strategic Recommendation: Focus marketing resources on **Tier 1 HCPs** and integrate digital marketing to support **field rep interactions** rather than running standalone digital channels.

HCP & Segment Analytics

PharmaForce IQ

Here is the 2-sentence explanation for this slide based on the data displayed:

- Across a targeted cohort of 361 total HCPs, the campaign generated 1,000 incremental prescriptions with an overall average prescription lift of 15%.
- Tier 1 prescribers proved to be the primary volume driver, contributing over 60% of total prescription lift (774 NRx) while top individual HCPs achieved up to 18 incremental

Budget Allocation & Optimization

PharmaForce IQ

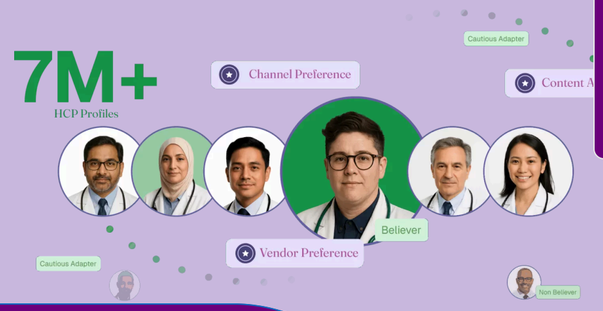

- **Channel Performance Summary**: Sales Rep Visits drove the highest conversion efficiency with a 31% prescription lift across 57 HCPs, while Email offered the most cost-effective acquisition at $8 per incremental NRx.
- **Strategic Budget Recommendations**: Reallocate budget from underperforming Display Ads ($28 per incremental NRx) toward scaling high-impact Rep Visits and utilizing Email/Search as preliminary

Scale (High ROI & Direct Impact)

Focus: Sales Rep Visits & Tier 1 Prescribers
Insight: Field visits consistently yield the highest prescription lift (30%–35%).
Action: Reallocate 15% of underperforming digital spend toward expanding high-touch rep interactions for Tier 1 Oncology and Cardiology HCPs.

Investigate & Refine

Focus: Email & Paid Search
Insight: Delivers low Cost Per Engagement (CPE) and strong engagement, but lower direct script conversion on its own.
Action: Use digital channels as pre-detailing touchpoints to nurture HCPs prior to rep visits rather than as standalone conversion drivers.

Review & Reallocate)

Focus: Display Ads & Generic Broad-Reach Web Banners
Insight: High Cost Per Incremental NRx with minimal impact on prescriber behavior.
Action: Scale back passive banner display spend and pivot budget toward high-conversion hybrid engagement models.
